

DRILCO

Introducing the
Wellbore Integrity Solutions

BROUSSARD FACILITY

Global Leadership.
Local Expertise.

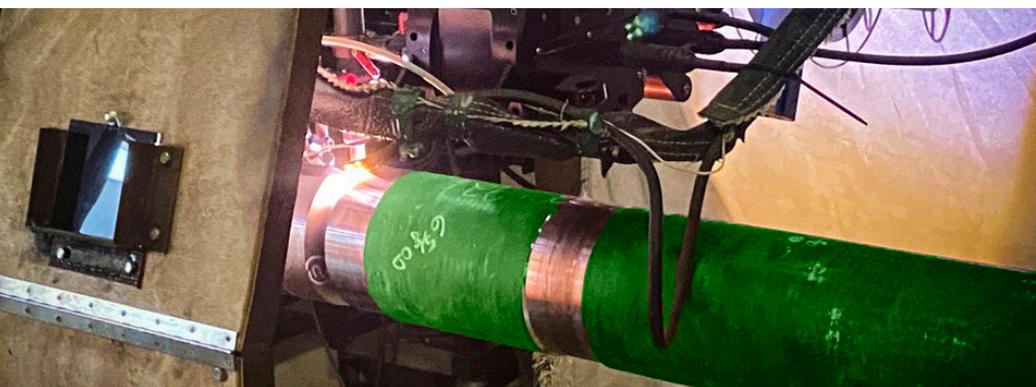

Proprietary Tubular Management System

Tubular Management System

Our Tubular Management System is a ONE STOP shop for our customers. This system tracks the tubulars being received, inspected, repaired, and shipped back to the rig saving our customers valuable time organizing these services individually.

Advantages:

- Immediate service for quick turnaround
- Frees up customer's time
- Removes the logistical cost of shipping to multiple facilities for each service
 - Direct Cost — trucking cost for separate services
 - Indirect Cost — time invested in managing shipments, unnecessary paperwork from multiple vendors
- QHSE — avoids unnecessary handling of tubulars
- All service documentation located in one location

Committed to Being the Best in the Gulf of Mexico

Being a global leader in wellbore integrity products and services, we are proud to bring our **renowned reputation** for **customer-focused service**, and in-house know-how to the **Gulf of Mexico**. With a singular focus on wellbore integrity throughout the life of the well, we are committed to delivering superior solutions to the region with the best people, processes and facilities.

Comprehensive Services

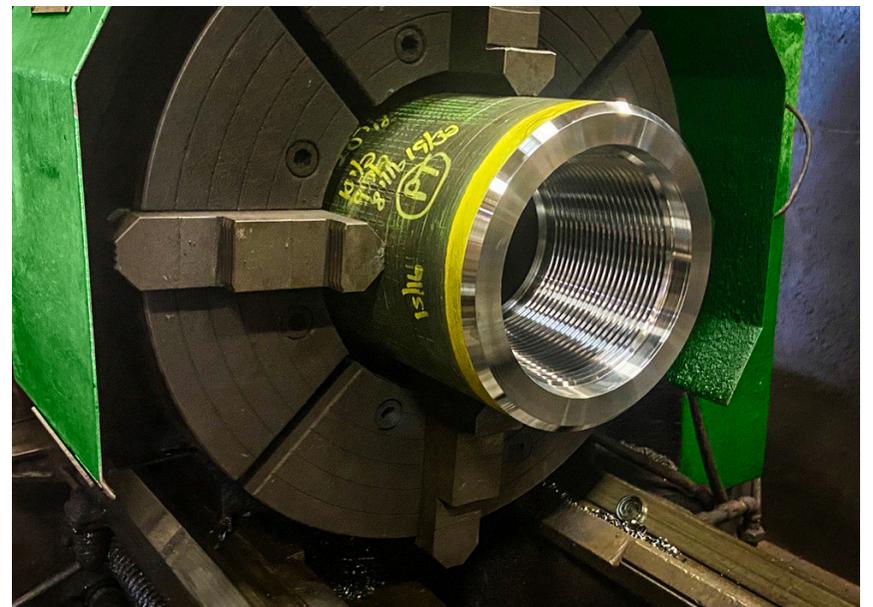

At our Gulf Coast facility located in Broussard, Louisiana, we bring the best of both worlds together: **global leadership** and **local expertise**. Our Broussard location gives customers fast and reliable access to quality inspection, high pressure water-blasting, machining and welding services.

Trusted Brand

For its long and successful history, our DRILCO brand has been synonymous with excellence and innovation in tubular products and services. DRILCO products and services are singularly centered on the **integrity of the wellhead**. From the invention of Hevi-Wate™ transition drill pipe, the first use of continuous-line heat treating for drill collars, to the pioneering of field inspection services and more, DRILCO has led the way in innovation and performance.

Services You Can Count On

We are proud of both our legacy and our **future**. As a **trusted partner**, we are committed to helping our customers reduce cost and risk by optimizing performance by providing the services and reliability needed to achieve **success** across the life-cycle of the well.

Highly trained machinists. Stringent testing methods.

Through our API compliant quality management system and 7-1 license we deliver consistent performance while complying with industry standards.

Service Leader in the Gulf of Mexico

Gulf of Mexico Services

To better serve our customers within the Gulf of Mexico Shelf and deepwater industries, DRILCO has nearly 10 acres of prime location in Broussard, LA. This strategic location allows DRILCO to provide services close enough to the Gulf of Mexico to be efficient and still be cost effective.

Inspection Services

We provide customizable inspection services to meet our customer's specific needs utilizing our highly trained ASNT Level II inspectors. We use rigorous testing methods to help prevent the failure of tubulars and downhole tools and identify the need for repairs minimizing our customers' downtime.

- Electromagnetic Inspection (EMI)
- Ultrasonic Inspection (UT)
- Full-Length Ultrasonic Inspection (FLUT) per DS-1 WT/TL/Obl
- Special End Area (SEA)
- Magnetic Particle Inspection (MPI)
- Dye Penetrant Testing (PT)
- Dimensional Measurements
- Thread Gauging
- Phased Array

Offshore Inspection Services

Sending tools off site can be costly. Therefore, DRILCO can provide multiple inspections offshore. Our team can dispatch four stocked and certified "walk-in" toolboxes with one or more inspectors within a few hours' notice. This quick response allows inspections of top drives, hoisting, handling equipment, or BHAs without additional vessel and handling charges to and from the dock.

Waterblast Services

DRILCO offers high-pressure water-blasting services ranging from 5k psi to 40k psi, allowing harsh drilling fluids and chemicals removal. This unit can remove coating and scale from the OD of the tubulars, thus eliminating the need for sand-blasting. The ID pressure reduction can protect the IPC or can remove flaking and peeling coating as well.

- Capable of up to 40K psi
- Clean tubulars from 2 7/8 inch to 22 inch OD
- Range 2 and Range 3 capable
- Can simultaneously waterblast ID/OD and brush OD

Machining Services

In conjunction with being API compliant, having a 7-1 monogram license, and having 65+ years of machining experience, DRILCO provides the highest quality and fastest lead time when repairing your downhole tools. With a fleet of four MAZAK CNCs and four Lehman Manual Lathes, all with cold rolling capability, a Shot Peen unit, and a state-of-the-art phosphate tank, DRILCO provides the following:

- Manufacturing of new sub-packages
- API connection repairs
- Specialty connection repairs

Customer Focused Repair Facility

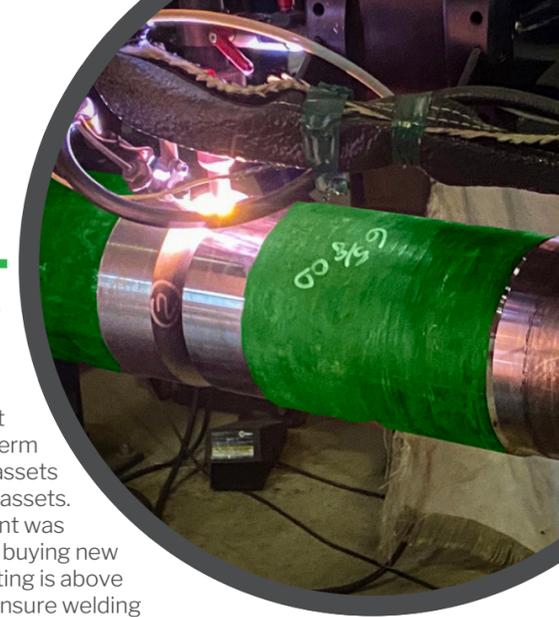

Welding Services

DRILCO is more than a machine shop. We pride ourselves on being a repair shop that brings value and long-term savings by preserving assets or extending the life of assets. A substantial investment was made in upgrading and buying new equipment and our testing is above industry standards to ensure welding repair processes are 100% compliant. Our team of welders are certified and qualified for each specific process.

- CERTIFIED Harbanding Facility of tubular tool joints
 - ARNCO Products (150XT, 200XT, 300XT & 350XT)
 - TCS Titanium
 - TCS 8000
 - Postle Products (Duraband & Tuffband)
- CERTIFIED facility for stub welding of P-550 & 1515HS non-magnetic material and 4145 steel materials using GTAW
- DRILCO is the only facility on the Gulf Coast with four head and two head units specifically for rebuilding tubular tool joint ODs once they have reached an industry-recognized minimum.
- Specialty Brazing and TIG welding for smaller assets

The People You Can Trust to Get the Job Done Right

Our team has deep local knowledge of the Gulf of Mexico and its unique challenges. No matter the job, we have what it takes to get it done reliably and efficiently. And because every challenge is different, we apply our technical knowledge and deep experience to customize an economical and effective solution.

COME SEE THE DIFFERENCE FOR YOURSELF.

We invite you to discover the many advantages offered at our Gulf Coast facility today. If you would like a facility tour, please contact DRILCO directly.
