### **Wellbore Integrity Solutions and Reactive Downhole Tools Announces Exclusive Licensing Agreement for the CHIMERA Product Line of Wellbore Cleanout Tools**

**HOUSTON – December 4th, 2020** – Wellbore Integrity Solutions (WIS) and Reactive Downhole tools (RDT) jointly announce an exclusive global licensing agreement for the Reactive CHIMERA suite of Wellbore Cleanout tools.

*“The CHIMERA portfolio is a great addition to the core business of WIS and the outstanding reputation the Reactive name has within the industry brings further validation to the deal”, states David MacNeill, President and CEO of Wellbore Integrity Solutions. “Additionally, the CHIMERA products provide good pull-through opportunities while complementing our current businesses, such as Wellbore Departure, Well Abandonment, Remedial and Intervention Services. As a result of this agreement, we anticipate significant service delivery efficiencies for our global customers and look forward to a mutually beneficial relationship.”*

*“Reactive is excited to partner with WIS as they strategically seek to grow their reach within the wellbore cleanout industry,” states Mike Allen, Chief Executive Officer of Reactive Downhole Tools. “This partnership will leverage the strengths of both RDT and WIS and allow us to take Chimera to the forefront of the wellbore cleanout market. I am confident that the months of preparation and effort that went into this agreement will not only enhance the quality of the product offering RDT started but will soon prove to be a top-tier offering both companies can be very proud to share.”*

Under the terms of the agreement, WIS will have exclusive rights to manufacture, brand, rent and/or sell the comprehensive range of CHIMERA Wellbore Cleanout Tools. These include the Cerberus™, ECO-MAX™, NR Mag™, Uni Blade™ and Well Praetorian™. Additionally, both companies agree to jointly develop new/complementary products for the CHIMERA portfolio.

The range of CHIMERA products will be made available through the global operational support footprint of WIS.
