

DRILCO

Introducing the
Wellbore Integrity Solutions

HUFFMAN FACILITY

Global Leadership.
Local Expertise.

Highly trained machinists. Stringent testing methods.

Through our quality management systems, we deliver consistent performance while complying with industry regulations.

Committed to Being the Best in Southeast Texas

Being a **global leader** in wellbore integrity products and services, we are proud to bring our in-house know-how to our customers by investing in our business with improved facilities and upgraded equipment. As an independent company with a singular focus on wellbore integrity throughout the life of the well, we are **committed to delivering superior solutions** to the region with the best people, processes, and facilities.

Comprehensive Services by Trusted Brands

Our Huffman facility brings the best of both worlds together: **global leadership** and **local expertise**. This location provides fast and reliable access to quality inspection services, rental tool services, whipstocks, a world-class machine shop and more. As a result, our customers can easily access leading products, services, and manufacturing expertise to support a turnaround project. WIS's DRILCO brand name has been synonymous with excellence and innovation in tubular products and services since 1960.

Products and Services You Can Count On

We are proud of our legacy and our future which provides the services and reliability customers need to **achieve success** across their well lifecycle. As a **trusted partner**, WIS's DRILCO team is committed to helping reduce costs and risks by optimizing performance.

Products and Services Leader for Southeast Texas

Superior Tubular Solutions

From the invention of Hevi-Wate* transition drillpipe, to the first use of continuous-line heat treating for drill collars, the pioneering of field inspection services and mobile field hardbanding units, DRILCO has been an industry leader. The “OK DRILCO” stencil is recognized as a symbol of quality throughout the oilfield industry.

DRILCO’s manufactured products include drill collars, Hevi-Wate transitional drill pipe, kellys, rotary substitutes (subs), accessories, and other BHA tools. Surface equipment such as the Ezy-Torq* hydraulic cathead, AccuTorque* automatic torque control system, Mud-Chek AP* mud saver valve, and other equipment is available to assist the drilling crew in the proper operation and use of the BHA and drill string components. DRILCO also specializes in the full suite of tubular management services such as field inspection, machine shop, and field hardbanding to provide expert maintenance for essential drill string components and equipment.

Inspection Services

To meet your specific needs, we provide customizable inspection services. Our highly trained inspectors use stringent testing methods to help prevent failure of tubular products and downhole tools or to identify the need for repairs so downtime is minimized.

- Electromagnetic Inspection (EMI)
- Ultrasonic Inspection (UT)
- Special End Area (SEA)
- Magnetic Particle Inspection (MPI)
- Dye Penetrant Testing (PT)
- Dimensional Measurements
- Thread Gauging

Machine Shop Services

Our highly trained machinists use state-of-the-art equipment to help you maintain tubulars. DRILCO wrote the book on the processes recognized today as the industry standard. Through our quality management systems, we deliver consistent performance while complying with industry regulations.

- API Connection Machining
- Premium Threaded Machining
- Hardbanding
 - Certified in multiple wire types, both steel and non-mag
- Tubular Management System
 - Tubular Lifecycle Management
- Tubular Accessories
 - Manufacturing of crossovers, lift subs, bit subs, saver subs
