

EZY-TORQ[®]

SELF-CONTAINED (SC) HYDRAULIC CATHEAD

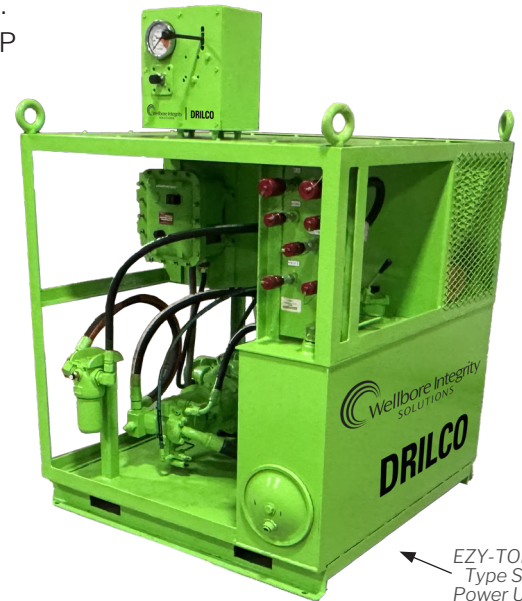

The **EZY-TORQ Self-Contained (SC)** is a fully self-contained system. It incorporates a hydraulic power source and a control console to operate the unit's hydraulic cylinder assembly, which includes a specially rated wireline for easy connection to rig tongs. The entire unit can be temporarily or permanently installed on the rig floor as a self-contained system featuring a choice of Hydraulic or Explosion Proof (EXP) radio transmitter control.

DRILCO[®]

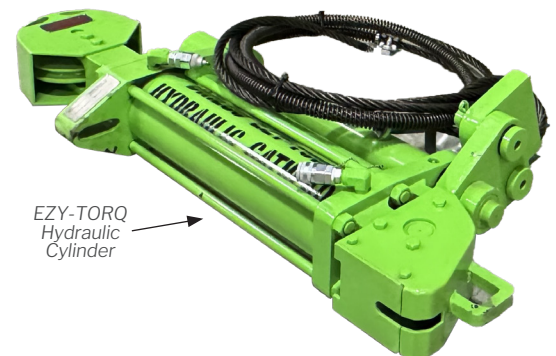

**DELIVERING
EXCELLENCE
AND INNOVATION**

FEATURES INCLUDE:

- Precise pressure control enables correct makeup.
- Simple hydraulic circuit ensures trouble-free performance.
- Remote Hydraulic and EXP Control operation eliminates electrical hazards.
- Backup control lever built into the control unit in event of remote control failure or loss.
- Utilizes the newest technology components ensuring prolonged life and performance.
- Increased flow rate to reduce cylinder extension and retraction time.
- All critical parts easily reached for maintenance or replacement if needed.
- Improved accessibility to spare parts.
