AND EXECUTION

Electromagnetic Inspection

Wellbore Integrity Solutions' (WIS) DRILCO is excited to present our new Tubular Electromagnetic Inspection Unit, a cutting-edge solution designed to elevate your non-destructive testing experience. With a focus on innovation and efficiency, our new Electromagnetic inspection unit introduces a host of upgrades that set it apart in the industry.

Advanced Capabilities

- Increased sampling resolution.
- WIFI signal transfer from buggy to system console eliminating troublesome signal cable.
- Measurement Digitalization for analytical analysis.
- Real-Time System Self Diagnostics ensuring accurate measurements at any point during inspection.
- Upgraded Graphic Interface with real-time viewing capability.
- 3D Graphical modeling of Flaws and Wall Loss

Upgrade your service today and redefine your non-destructive testing experience. Embrace innovation, efficiency, and accuracy with the future of Electromagnetic Tubular Inspection.
